THE INSIDE STORY BEHIND THE DEVELOPMENT **OF THE COVID-19 VACCINE**

Director (retired), National Viral Research Lab National
Institutes of Health

OCTOBER 19, 2021

7:30 p.m.- Virtual

As featured in the New Yorker and other national publications: Barney Graham worked for years on a method to alter viral proteins to a vaccine-usable form and to build the RNA platform to induce the proteins' production in the human body. When COVID hit, he worked round-the-clock. In record time, he applied this knowledge to develop a safe, effective vaccine. Hear what it was like to be thrust into a position where the crucial need to avert a global catastrophe puts one's life work and scientific expertise to the test.

Barney Graham, MD. PhD.
Director (retired), NIH NVRL

This activity has been planned and implemented in accordance with the accreditation requirements and policies of the Accreditation Council for Continuing Medical Education through the joint providership of the American Psychiatric Association (APA) and the Washington Psychiatric Society. The APA is accredited by the ACCME to provide continuing medical education for physicians. The American Psychiatric Association designates this live activity for a maximum of 1.5 AMA PRA Category 1 Credits™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.
