

EDUCATIONAL PROGRAM

Supervisory, Collaborative and Consultative Relationships (Risk Management: Overcoming Barriers to Implementation in Psychiatry)

February 3, 2021 / 7 p.m. - Via Zoom

There are three traditional split treatment roles in psychiatry: supervisory, consultative, and collaborative. This presentation will address the risks associated with each role, the importance of understanding the state and federal laws and regulations pertaining to the formation of doctor-patient relationships, providing consultations and acting in the role of a supervisor, and risk management strategies to overcome barriers with each role.

Objectives for the presentation are to:

- Recognize the types of roles in split treatment: supervisory, consultative and collaborative relationship and the liability issues involved
- Identify the importance of supervision of trainees and office staff and malpractice issues which can result
- Discuss case examples when working with other providers in the care and treatment of patients
